LinkedIn • <https://www.linkedin.com/in/baibhav-kc-388b571aa> Github • <https://www.github.com/xxfreeshroudx>

Results-driven Senior Software Engineer with over 5 years of experience building and scaling high-performance web applications. Specialized in full-stack development using **TypeScript, React.js, Next.js, and NestJS**, with a proven track record of delivering robust, maintainable code and intuitive user experiences. Adept at **performance optimization, accessibility, and SEO**, leading to measurable gains in speed, usability, and conversion. Strong foundation in the **MERN stack (MongoDB, Express, React, Node.js)**, **RESTful API design**, and modern **DevOps** practices. Highly collaborative and detail-oriented, with a deep understanding of software architecture, scalability, and agile methodologies.

EXPERIENCE

Senior Fullstack Engineer

Singapore

MusicGPT

Jul, 2025 -Jan, 2026

- Led end-to-end development of a **multi-speaker Text-to-Speech (TTS) system**, owning architecture, UI, state management, and real-time audio workflows from scratch.
- Designed and implemented **voice creation and management flows**, including recording, file upload, YouTube import, waveform visualization, audio trimming, editing, and optimistic updates.
- Built **real-time lyrics transcription and improvement system** using Socket.io, enabling live updates, AI-powered enhancements, and dynamic lyric editing workflows.
- Developed and enhanced **core audio tools** including Remix, Extend, Inpaint, Sing Over Instrumental, and Sound Generator, forming key revenue-driving product features.
- Re-architected **Discover & Search experience**, implementing intelligent cross-section search (songs, radio, playlists) and migrating state from Context API to Zustand.
- Implemented **performance optimizations** including aggressive caching strategies, Suspense boundaries, dynamic imports, and selective lodash imports, achieving **~80% bundle size reduction** in affected areas.
- Improved onboarding and authentication flows with accessible, multi-language UI, welcome modals, surveys, and unified auth state management.
- Implemented internationalization (i18n) support across **8+ languages**, including Japanese, Korean, Chinese, German, Spanish, French, Italian, and Portuguese.

Senior Frontend Developer

Lainchaur, Kathmandu

Bookmundi Aps

Oct, 2023 - Jun, 2025

- Designed and implemented most of the **frontend and backend API integrations** for the Bookmundi platform.
- Led the successful migration of legacy **Yii** pages to modern **Nuxt.js** and **Next.js** frameworks, enhancing maintainability, performance, and developer velocity.
- Engineered RESTful APIs using NestJS, adhering to clean architecture principles and industry best practices.
- Reduced JavaScript bundle size by **40%** through strategic **code-splitting, tree-shaking, and advanced caching techniques**, resulting in faster initial page loads.
- Gained proficiency in **Next.js** and **TypeScript**, becoming a **key contributor** to the development team.
- Utilized **TanStack Query(React Query)** and **SWR** for **data fetching and caching strategies**.
- Worked extensively with server and client components to optimize application performance.
- Optimized rendering logic and **minimized prop drilling**, reducing unnecessary component re-renders, resulting in a noticeably smoother and more responsive user experience.
- Worked with **Docker** for local development, building and managing containers.
- Enhanced website performance by implementing **lazy loading** for images and components, improving accessibility, and optimizing core web vitals such as **LCP, FCP, and CLS**.

Fullstack Developer | Freelancing

Japanese Company

Japan

Jul, 2022 - Nov, 2022

- Developed user-friendly interfaces using **ReactJS**, **HTML**, **CSS**, and **JavaScript** for an **expense management system** in collaboration with a Japanese company.
- I got a chance to learn backend using **Spring Boot** and gained a good understanding of **JAVA** as well.
- Implemented **React Router** for seamless navigation and improved user experience.
- Incorporated API calls and gained in-depth experience with **REST APIs**.
- Achieved a deep understanding of state management concepts using React's built-in state and props systems.

Frontend Developer

Lightweb Group Pvt. Ltd.

Gongabu, Kathmandu

Jan, 2020 - May, 2022

- Started as a frontend developer after a successful 6-month internship. Transitioned from personal projects to handling professional tasks.
- Initiated personal projects, refining skills in **React**, **HTML**, **CSS**, and **JavaScript**. Evolved into contributing to more complex projects with professional design standards.
- Gained a solid grasp of **Git**, mastering version control for efficient code management. Learned best practices for interface design, focusing on user experience and aesthetics.
- In a team, shared help and learned from teammates. Found that talking and working together really helps get things done. Learned the value of effective communication in driving projects forward.
- Expanded skills beyond design aesthetics. Gained insights into web accessibility, recognizing its importance. Developed expertise in optimizing **SEO** and **improving website performance**.

Graphics Designer | Freelancing

For a Local Restaurant named Suku Chhe

Mahadevstan, Kathmandu

Nov, 2019 - Dec, 2019

- Designed an attractive and user-friendly restaurant menu, focusing on aesthetic presentation and ease of navigation for customers.
- Crafted a unique and memorable logo for "SukuChee", a local restaurant in Mahadevstan using Adobe Illustrator, Photoshop as well as Canva.
- Extended design skills to create a website for SukuChee, despite the unfortunate circumstance that it's not live at the moment.

EDUCATION

Bsc CSIT

New Summit College

Santinagar, Kathmandu

+2 Science

Goldengate Int'l College

Gausala, Kathmandu

SLC

Glee Academy School

Dhangadhi, Kailali

PROJECTS

Ticker - Your Time Tracking Companion | Professional Project

- Created Ticker, a time tracking application similar to Clockify using **ReactJS**
- User-friendly and efficient time tracking app similar to Clockify for easy **time tracking and management**
- **Comprehensive reporting and analytics features**, empowering users to gain insights into their time usage

- Tools Used: HTML, CSS, TailwindCSS, JavaScript and TypeScript

<https://ptt-frontend-dev.proshore.eu>

Music App Landing Page (SPA) | Personal Project

- Music App landing page build with ReactJS
- Animations and Transitions added in the landing page
- Language Used: HTML, CSS, JavaScript

<https://darling-basbousa-7d049b.netlify.app>

Ecommerce Website | Personal Project

- Created an ecommerce website using ReactJS for any devices ranging from laptop to a smartphone
- Implemented Cart system using LocalStorage which can store product items added even after refreshing the page
- Implemented Dark/Light theme using the Context API
- API Used: Fake Store API
- Language Used: HTML, CSS, Tailwind CSS, JavaScript, TypeScript

<https://namaste-bazaar.netlify.app>

Omnifood Nepal | Personal Project

- Created a fully responsive single-page application with proper optimization for performance, accessibility, SEO and using best practices after running test using Lighthouse (95+ score on lighthouse)
- Created custom classes and added general CSS rules for proper designing of the page only using vanilla CSS (general CSS)
- Language Used: HTML, CSS, Javascript
- Reusable CSS classes and HTML components used.

<https://omnifood-nepal.netlify.app>

Personal Portfolio Website | Personal Project

- Fully Responsive portfolio website on my own domain with all my completed projects you can visit.
- Language Used: HTML, CSS, Javascript

<https://baibhavkc.com.np>

Weather Application | Personal Project

- Fully Responsive Weather App build with ReactJS
- API Used: AccuWeather
- Language Used: HTML, CSS, JavaScript

<https://friendly-mccarthy-aedd65.netlify.app>

QR Code Generator | Personal Project

- Created a QR code generator using ReactJS
- Able to generate as well as print the QR code generated from this application
- Language Used: HTML, CSS, JavaScript

<https://qr-generator-nepal.netlify.app>

Todo Application | Personal Project

- Todo App build with ReactJS
- Customized individual lists with 4 different colors
- Language Used: HTML, CSS, Javascript.

<https://sharp-leavitt-a15a28.netlify.app>

TRAINING/CERTIFICATIONS

Proshore Bootcamp 3.0 | Frontend Developer (React JS)

Proshore Nepal Pvt. Ltd.

- Worked as a frontend React developer in Proshore Bootcamp.
- Learned more about reusable classes and components as well as gained proficiency in TypeScript.
- Learned to use and master GIT and Jira as a professional developer
- Learned basic and advanced understanding of React and TailwindCSS to create user friendly interfaces
- Incorporated API calls, including bearer tokens, to ensure seamless integration with the backend
- Gained technical as well as soft skills like communication, working in a team, presentation skills and many more
